

CONSENT FORM ORAL CANCER SCREENING

Oral cancer has one of the highest death rates of all cancers, killing one person every hour of every day. This is primarily due to the fact that most oral cancers are identified at a late stage.

Willow Tree Dental is committed to providing the best care for every patient using the latest advances in dental and medical care. As part of the effort, we're pleased to offer advanced oral cancer screening with Identafi, a device that greatly enhances our ability to find early signs of cancer and dysplasia in the mouth. Identafi is a fast, painless screening technique that uses three wavelengths of light to provide far better views of abnormal tissues than traditional exams with white light alone.

Early detection is critical to achieving positive outcomes in oral cancer. We're pleased to be able to provide our patients with this powerful tool in the battle against oral cancer as part of our ongoing commitment to preventive health care.

Please sign the form below indicating whether you would like advanced cancer screening with Identafi. If you have questions, please feel free to ask any member of our staff for more information.

YES. I would like an advanced cancer screening with the StartDental Identafi system.
I accept financial responsibility for the examination.

NO. I would prefer not to have the examination at this time.
